

31st ANNUAL RNAP WORKSHOP

11-12 April 2019, Clarendon Laboratory, University of Oxford, UK

This meeting aims to bring together UK and international research groups with an interest in RNA polymerases and transcription in all organisms to discuss recent advances in the field.

Topics will include:

- new biochemical assays for RNAP and transcription factor function
- structural biology of RNA polymerases
- single-molecule studies of mechanisms of transcription
- RNAP inhibitors and their mechanism of action
- single-cell transcription studies using super-resolution microscopy

Keynote speaker: Professor Richard Ebright, Rutgers University, USA

Registration opens on February 18th and closes on April 1st 2019; includes accommodation at Lady Margaret Hall College, Oxford.

Co-organisers: Achillefs Kapanidis, Nicole Robb and Abhishek Mazumder
